

WE MAKE THE IMPOSSIBLE POSSIBLE

OUR COMPANY

DXGSOFTS

The Trusted Source In It Services And Support

Dxgsofts is a privately owned IT support and service business in India and UK, collaborating with PTAH, one of the leading group of companies in London

Today we are privileged to connect with a number of customers everyday with exceptional products. We are genuinely client focused and determined to succeed and draw inspiration from challenges.

IT Services

Digital Marketing

INNOVATION

Contribute something new and different to achieve rapid growth

EXCELLENCE

Always keep the trust, credibility and loyalty that comes from happy customers by providing good quality products and services.

COMMITMENT

Develop a positive relationship with the customer by meeting or exceeding their expectations

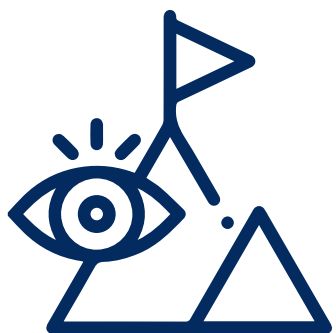

TEAM WORK

Work together to fulfill the demands of our customers and to strive the success for our company.

MISSION

To be the leading IT company in the world, delivering the most innovative, relevant and profitable customer experiences and hence inspire millions of people to become entrepreneurs

VISION

To provide outstanding and comprehensive software solutions to handle all the changes, trends and challenges that comes before users

VALUES

Our values are the principles that guide our internal conduct as well as relationships with our customers, employees and partners.

INDUSTRIES WE SERVE

Customized for Your Industry

MANUFACTURING

Digital manufacturing technologies integrate systems and processes from design to production and on to the servicing of the final products.

HEALTHCARE

Various technologies include health record systems, personal health tools including smart devices and apps; and finally, communities to share and discuss information.

HIGHER EDUCATION

Online Education has become a global hit but still, many students do not conceive it as a professional model of education. Implementing appropriate technology is under the discretion of the institution and their requirement.

CONSTRUCTION

A Comprehensive Software Solution to Manage Real Estate & Infrastructure Houses. Covering Pre Sales, Post Sales, Broker Management, Customer App & Followups. User Friendly Interface. Versatile & Flexible. Complete Configurable.

ENTERPRISE TECHNOLOGY

Enterprise technology refers to the concept of information technology (IT) resources and data that are shared across an enterprise. Increased agility, responsiveness, and security are some of the aims of enterprise technology – or the systems, platforms, and tools that are shared across an organization

E-COMMERCE

Over the past 20 years, eCommerce has seen an astounding rise in importance in B2C relationships. It's become so significant that for many businesses, their brick-and-mortar physical presence comes second to their online presence.

Our Technical Expertise Allows Your Business to Streamline Workflow and Increase Productivity. No Matter the Business, Dgxsofts will Provide You Proper Solutions Customized to Your Company's Specific Needs.

WORKPLACE SOLUTIONS

AGILE PROCESS MANAGEMENT

Digitally transform existing operating models, or create new ones, to drive innovation and business success with reduced business disruptions, human errors, operational risks and cost

ANALYSIS MODERNIZATION

We help you to analyze, prioritize and convert data workloads and modernize the data analytics and AI fabric. Our experts will provide recommendations to generate maximum business values

ANALYTICS AND AI PLATFORM

The Analytics and AI Platform solutions will help you to introduce analytics into your organization which in turn help to build improved business insights more quickly but with significantly reduced costs

AUDIENCE RESEARCH

It is critical to recognize the target consumer to expand your audiences using external and internal data sources. We can help you understand your target audience and the audience that you want to reach even at a limited budget

BESPOKE SOFTWARE

We offer customized software solutions and services flexible to the product features and details. Custom development is accompanied by specialized support. This allows to provide stable and secure applications

CARDS AND PAYMENTS

Card and Payment Services enable you to attain top quality functional effectiveness that upgrade customer service, improve time and make profit. Help to address all aspects of card payment value chain

CLOUD SERVICES FOR AWS

We also assist organizations in updating their Windows applications to the most recent versions of Microsoft Windows and MS SQL. With a complete family of EC2 instances, AWS helps clients cut their total expenses of running Windows in the cloud, and we work with enterprises to help them maximize these opportunities and define a plan with their important business and technical objectives.

CUSTOMER EXPERIENCE

Our services will help to increase your sales and improve customer retention with less efforts and reduced costs. The Strategies will make customer engagements more appropriate, precise and speedy

A hand is holding a black USB drive next to a laptop keyboard. The laptop screen is visible in the background, showing a code editor interface with tabs for 'Console' and 'Problems'. The status bar at the bottom of the screen displays 'Ln 11, Col 24 Spaces: 2 UTF-8 LF JSON'.

CYBER DEFENCE

Security Platform ensures continuous monitoring and management to deliver an efficient security response and clearly visualize security posture

A blue background with a blurred 'Security' text and a grid pattern.

DATA PROTECTION

Dxgsofts will safeguard your business with actions, strategies and solutions to identify and protect sensitive and private information

DIGITAL BUSINESS PLATFORMS

Digitize and optimize business processes and applications to accelerate performance. Digital solutions will help to achieve successful business outcomes

DIGITAL IDENTITY

Our services enable you to control access to important data and obtain authority of identity management for your users, partners and employees

DIGITAL INDUSTRY CONSULTING

We provide expertise in industry transformation, business model innovation and industry-specific processes to support your transformation projects

DIGITAL SUPPORT SERVICES

We provide personal workplace support experiences which enable your employees to work the way they prefer, with access to technologies that support them work more efficiently, without any interference

E-COMMERCE

E-commerce will expand the markets to national or international levels with minimal capital. You can easily locate customers, suppliers and business partners with improved organizational and client benefits.

FINANCE AND ADMINISTRATION

Boost your business functions for financial controls and actively use top level technologies to monitor and achieve improved performance across key processes and activities

HR MANAGEMENT

Outsource Human Resource to bring a united and coherent employee experience and drive quickness and efficiency across all your HR functions for lively and reliable service deliver

HOSTING AND NETWORK SERVICES

Optimize and manage fast, self-service provision across hybrid cloud services with service management, financial management, operations and analytics

A network of light blue clouds connected by thin lines, set against a dark blue background. Each cloud contains a white icon: a database with an upward arrow, a Wi-Fi signal, an envelope, a location pin, a speech bubble, a group of people, and two interlocking gears.

IT MODERNIZATION

DXGSOFTS will assist you to remove complexities and enhance existing applications to a secure multi cloud environment and drive with agility and flexibility

A person wearing a white VR headset and a white long-sleeved shirt, gesturing with their hands as if interacting with a virtual environment. The background is dark and indistinct.

INDUSTRY SOLUTIONS

Supports businesses with new tools and applications like augmented reality, virtual reality and mobile business solutions to engage in the digital world in better ways and compete more effectively

INFRASTRUCTURE SECURITY

We will help to drive infrastructure and endpoint security services to reduce data and network risks, enhance security protection, and enable innovation and prosperity in business

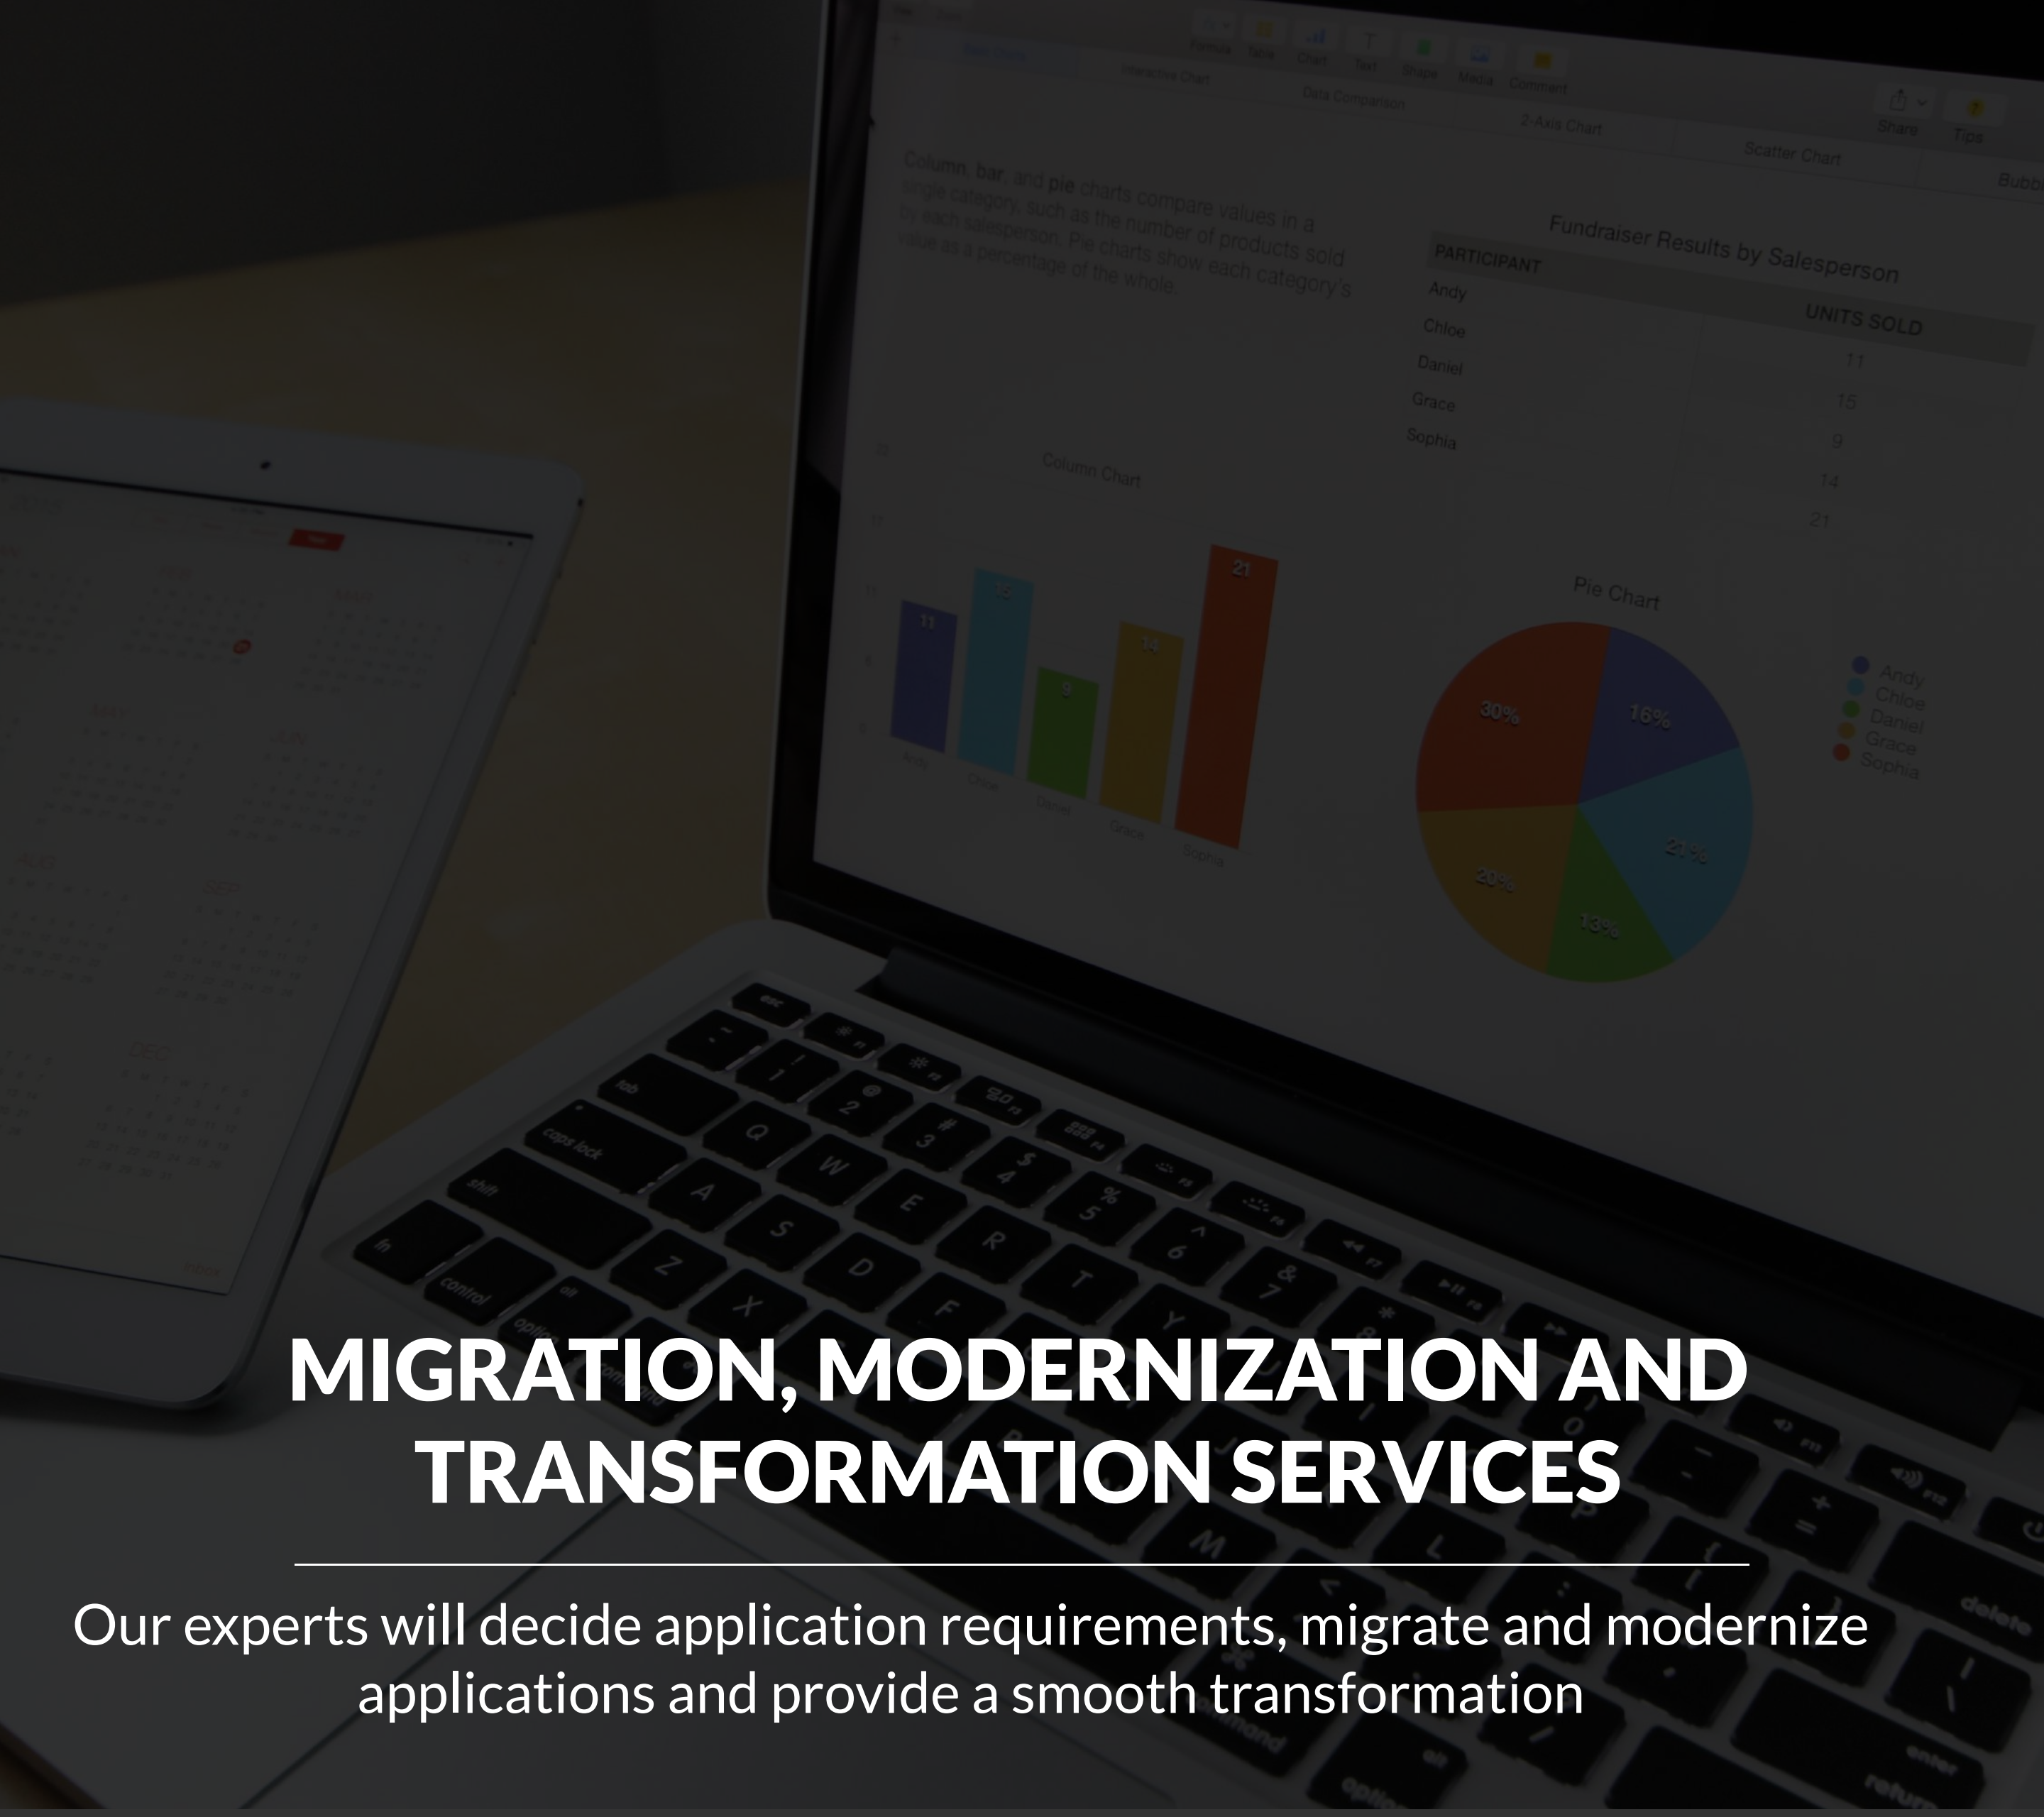

INTELLIGENT COLLABORATIONS

Intelligent Collaboration solutions will transform your environment to a modern collaboration services with change management. Our solutions will help to get high-quality multi-channel communications.

MARKET ANALYSIS

Marketing analysis provides the capabilities to gather information about different market variables and dynamism in the market. Focusing on these factors formulating a business strategy which helps to achieve great success in the market
